

C Quiz 2 Questions & Answers (04-11-2023)

1. What will be the output of following program ?

```
#include <stdio.h>
void main()
{
    !printf("") ? printf("Sunbeam") : printf("Karad");
}
```

Answers

1. Sunbeam
2. karad
3. 1
4. 0

2. What will be the output of following program ?

```
#include<stdio.h>
enum menu
{ a=2,b,c,d=-1,e};
enum menu m;
int main()
{
    printf("%d %d",b+a,e+d);
}
```

Answers

1. 2 3
2. 0 1
3. 5 -1
4. Error

3. What will be the output of following program ?

```
#include <stdio.h>
void main()
{
    int a=10;
    switch(a){
        case 5+5:
            printf("Pune\n");
        default:
            printf("Karad\n");
    }
}
```

Answers

1. Pune
Karad
2. Pune
3. Karad
4. Compile time error.

4. Find the output of the following:

```
int main()
{
    int m=1,n=1;
    if(--n && n || n--)
        printf("%d",m ^ n);
    else
        printf("%d",m & n);
}
```

Answers

1. 0
2. 1
3. -1
4. -2

5. What will be the output of following program ?

```
#include<stdio.h>
int main()
{
    char ch;
    if((~sizeof(ch) + !sizeof('A')))
        printf("Hinjewadi");
    else
        printf("MarketYard");
    return 0;
}
```

Answers

1. MarketYard
2. Hinjewadi
3. NO OUTPUT
4. Hinjewadi
MarketYard

6. Find the output of the following:

```
int main()
{
    int x=0,y=0,z=0;
    if(x!=3,y!=2,z==1,z)
        printf("x=%d y=%d",x,y);
        printf("x=%d y=%d z=%d",x,y,z);
}
```

Answers

1. x=0 y=0 x=1 y=1 z=0
2. x=1 y=0 x=0 y=0 z=0
3. x=0 y=0
4. x=0 y=0 z=0

7. Which is true statement of the following:

- I. We can substitute any kind of if else code with switch code.
- II. We can use the same expression with multiple if.
- III. We can use the same expression with multiple cases within a single switch.
- IV. Use of default case is optional in switch case like else with if.

Answers

- 1. III
- 2. II
- 3. IV
- 4. I

8. `int main()`

```
{
    typedef enum words{STRONG=1,SIMPLE,WEAK} WORD;
    enum tastes {SWEET=1,TANGENT,SOUR,SALTY} TASTE = SOUR;
    switch(TASTE)
    {
        case SOUR:
            printf("RAW MANGO");
            break;
        case WEAK:
            printf("Weak word");
            break;
    }
}
```

Answers

- 1. WORD here is a local variable.
- 2. TASTE here is a local variable but we can not assign it with SOUR which is an enumerated field of another enum.
- 3. Above code is not a valid code as SOUR & WEAK are representing the same constants which is causing the use of duplicate case in switch.
- 4. If we are checking TASTE for various cases then it is illegal to use case WEAK here.

9. #include <stdio.h>

```
int main()
{
    int var;

    var=5>7?6:1!=8<9?50:60;

    printf("%d", var);

    return 0;
}
```

Answers

1. 6
2. 50
3. 1
4. 60

10. What will be the output of following program ?

```
#include<stdio.h>
enum menu
{ a=2,b=3.56 };
enum menu m;
main()
{
    printf("%d%d",a,b);
}
```

Answers

1. 2 3
2. 0 1
3. 2 3.56
4. Compile Time Error
